

THE SAEREN CHRONICLES
BOOK THREE

She put the world back together. Now she has to carry it.

Months after the severing was mended, the old order is ash and every living soul carries both halves of the gift — and Viridia feels all of them. She is the source now: the still point a remade world turns on, and the one person who cannot put it down.

Then the portals begin to open, and the things that come through do not attack. They come toward her. Whatever is loose in the world is being pulled to the source — and the source is a girl who has already spent almost everything she had.

In saving her world she made the thing that will unmake it. What she does with that power — and what she refuses to become to use it — is the last question the Saeren Chronicles will ask of her.

The conclusion of The Saeren Chronicles — a fantasy about power held without cruelty, the people who keep you human, and the weight of being what everyone else needs.
